Re: Universal Manufacturing Corporation

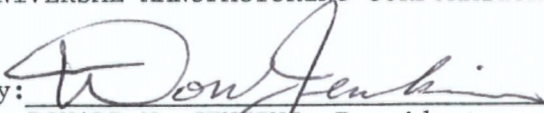

We acknowledge receipt of a copy of the report of Suzanne E. Milham dated April, 1986, in November, 1987. The company is studying the report and has submitted it to its consultants, its insurance carriers, and attorneys.

We will be in further communication with you as soon as our consultant Nuclear Fluids, Inc., attorneys and insurance carriers are able to digest the report and react to the findings in it.

In the meantime, however, you may be assured that no contamination has occurred at the Universal site since the soil samples were taken in the Fall of 1985. Should you wish to review our existing procedures, you are welcome to do so upon making arrangements with Mr. Greg Jenkins, General Manager of the company.

I trust that this matter may be resolved to the mutual satisfaction of all concerned at an early date.

UNIVERSAL MANUFACTURING CORPORATION
